Sorting Organics is as Easy as 1 - 2 - 3!

1 SEPARATE

Separate food and paper used for food or drink from trash and recyclables.

2 COLLECT

Use a reusable container, or place in a paper bag or newspaper.

3 DISPOSE

Bin may also be beige with green top.

Empty reusable container or toss paper bag or newspaper into organics service container.

Please keep liquid, glass, metal, and plastic, including biodegradable/compostable plastic out.

Composting helps reduce green-house gasses and creates a valuable soil amendment for farms and gardens.
